

There are Many Facets to Dementia...

Dementia is not just about losing your memory

Early diagnosis gives time to plan and gives family and friends time to get help and support

There is more to a person than the Dementia

We can help to fight Dementia through research!

It is possible to live well with dementia

'Sometimes I act out of character'

Dementia does not discriminate

'I can't always communicate how I feel'

'It can also affect my thinking, communication and everyday tasks'

Research into Dementia will improve care for people today and find a cure for tomorrow

Dementia: Not just old and confused...

A Reason to Research!

**We are interested in discovering more
about Dementia...
...Are you?**

DeNDRoN research projects aim to help improve the understanding and treatment of Dementia and memory disorders

If you are interested in learning more about Dementia research or would like to participate in Dementia studies in your area please contact a member of our team:
