Morland House Surgery	24	9994	0.20%		1 patient		1 patient	2 patients			

GP surgeries: selection process

81 surgeries were identified in Oxfordshire using QOF Data (available at <http://www.gpcontract.co.uk>)

From PCT data, the list sizes (population served) were recorded

From PCT data, the number of patients with a diagnosis of dementia were recorded

To calculate the %age of people with dementia serviced by the surgery, the following calculation was done:

number of patients with a diagnosis of dementia/list size

Old Age Psychiatrists and Nurses in Oxford Health NHS Foundation Trust were asked with which surgeries they had good working relationships or could make recommendations for forging links – this was recorded

Participants in DeNDRoN studies (since 2008) linked to GP surgeries were recorded

If the surgery is a training surgery, this was also recorded

From 81 surgeries, 22 “research-friendly” surgeries were selected

GP Practice	# Dementia Patients	List Size	Ratio	Consultant recommendations	CONCERT	MAG D	GERAS	DOMINO	MAIN-AD	Training Practices	Comments
