Patient Consultation Exercise by South West DeNDRoN

INFORMATION SHEET

What is South West DeNDRoN

South West DeNDRoN is the regional branch of the national Dementias and Neurodegenerative Diseases Research Network. It is funded by the Department of Health and its role is to improve the delivery of research into dementias, Parkinson’s disease, Motor Neurone disease, Huntington’s disease and Progressive Supranuclear Palsy. It coordinates and provides trained staff to run studies.

The Purpose

The purpose of this consultation exercise is conduct a ‘listening exercise’ during May 2012 – Sep 2012 with patients and families. Feedback will directly influence future research projects.

Geographical area covered

SW DeNDRoN covers Cornwall, Devon, Avon, Somerset, Wiltshire and Gloucestershire. In view of time and resources limitations, this consultation exercise is focussing on the following regions, although analysis and reporting will be framed so as to be relevant to stakeholders across the whole region:

- Dementias – Plymouth, Bristol and Exeter regions
- Parkinson’s disease – Plymouth, North Devon region
- Motor Neurone disease – Plymouth, Bristol and Exeter regions
- Huntington’s disease – Plymouth, Exeter region

How are we doing this?

During May – Sep 2012 we are meeting with patients and families through existing forums and events, for example dementia cafés, local support groups, regional events etc. We may also conduct face to face and telephone semi structured interviews using a simple questionnaire.

We hope to collect examples of good practice as well as examples of challenging situations.

Tell me about the new Patient Advisory Panel

We are developing a new virtual Patient Advisory Panel to provide leadership on DeNDRoN’s research activities across the South West. It works in partnership with many other local and regional patient advisory groups for dementias, Parkinson’s disease, Huntington’s disease, Motor Neurone disease and Progressive Supranuclear Palsy. Together we offer patients and the public the unique opportunity to be involved in a variety of ways, from regional to local level.
What are we asking patients and families?

1. How would patients like to find out about opportunities for being involved in research?

2. What would encourage patients to be involved in research?

3. When would patients be comfortable to start discussing with a health professional opportunities for being involved in research?

4. What information would be interesting in a research newsletter for patients and families?

Additionally:

- Would they like to join SW DeNDRoN’s Patient Advisory Panel?
- Would they like to sign up for SW DeNDRoN’s newsletter?
- Would they like more information on taking part in a study themselves?

What would it mean to take part in this consultation exercise?

1. Always being given the choice about being involved, and being able to change your mind at any time.

2. Completing a questionnaire and having a short discussion with the project worker about improving public involvement in research study. This may mean taking part in a telephone or face to face discussion.

What will happen to the information provided?

The information provided will be stored securely in accordance with NHS information governance regulations. The results of the exercise will be written up in September and available to the stakeholders and to everyone who participated in it.

Who is the main contact?
Alison Fowler - Project Manager South West DeNDRoN
Tel: 0117 3784239  Mobile: 07919 213154   E-mail: south-west@dendron.org.uk
Website:  www.dendron.org.uk/rn/sw.html
Patient Consultation Exercise by South West DeNDRoN

Please complete and return this form to: SW DeNDRoN, AWP Research and Development Office, The Blackberry Centre, Blackberry Hill Hospital, Manor Road, Fishponds, Bristol BS16 2EW

Or e-mail: south-west@dendron.org.uk

Or complete our online survey: www.dendron.nihr.ac.uk/south-west

1. How would you like to find out about opportunities for being involved in research? Please tick box(es)

   GP
   Practice Nurse
   Hospital consultant
   Hospital Nurse
   Pharmacy
   Public library
   Support groups
   Dentist
   Radio, TV
   Newsletters
   Newspapers
   Parish activities

   Friends and neighbours
   Other

2. What would encourage you to be involved in research? Please tick box(es)

   Personal reasons - “doing something positive in a negative situation”
   Access to research teams and consultants
   Opportunity to increase knowledge about the disease
   Opportunity to test new ways of managing the disease

   Other

3. When would you be comfortable to start discussing with a health professional opportunities for being involved in research?

4. What information would be interesting in a research newsletter for patients and families?
Expression of Interest to be involved in South West DeNDRoN

Please complete and return this form to: SW DeNDRoN, AWP Research and Development Office, The Blackberry Centre, Blackberry Hill Hospital, Manor Road, Fishponds, Bristol BS16 2EW
