DeNDRoN is... part of the research arm of the NHS. It supports research in the NHS for people affected by dementia, Parkinson's, Huntington's, motor neurone disease, progressive supranuclear palsy and other neurodegenerative disorders.

Be Involved
The Patient List hold names of people who have said they would consider joining a clinical study, if there was one suitable for them.
Get involved

For Doctors and Researchers
DeNDRoN's well trained team provides practical support. We help with study development, Good Clinical Practice training, Research and Development approvals and ethics, study set up and recruitment.
Enter support area

Patient, Carer and Public Involvement Panel
We link health professionals and patients through the Patient, Carer and Public Involvement Panel.
More information

Research Studies
DeNDRoN studies enable the NHS to improve. Find more information regarding specific areas of clinical research that we are involved in
View research studies

Research is a core part of the NHS.
